**Subject: Ground Investigation Surveys**

Dear Occupier,

We are writing to inform you of upcoming ground investigation surveys taking place in your area in relation to the proposed Morgan and Morecambe Offshore Wind Farms: Transmission Assets project.

These surveys are scheduled to begin in early/mid-August and will continue through to end of October 2025.

From August 2025, we plan for mobilisation activities to begin, which will include the setting up of temporary site compound(s). The surveys will then commence shortly thereafter with all works to be completed October 2025.

The surveys are due to take place Monday to Friday, between 8am to 6pm (no week-end working).

The surveys are an important step in obtaining the relevant information to help inform the detailed engineering design for the project. We understand that any survey activities can cause concern, and we want to reassure you that every effort will be made to minimise disruption.

During the surveys you may notice the use of machinery, such as small drilling rigs or excavators. The nature of the work means there may be some localised intermittent noise during working hours noted above.

Please be assured that these surveys **do not** constitute the start of any construction work for the proposed Project.

The teams on site will make every effort to minimise any disruption that may occur.

If you experience any issues during the survey activities, please don't hesitate to contact the project team.

You can contact us at [info@morecambeandmorgan.com](mailto:info@morecambeandmorgan.com) or call 0800 915 2493 (option 3) (Monday to Friday between 9am and 5pm).

Yours sincerely,

On behalf of Morgan and Morecambe Offshore Wind Farms: Transmission Assets project
